CHASE R. HAMILTON

Senior Linux Infrastructure & Enterprise Storage Systems Engineer

📍 Dallas-Fort Worth, TX (100% Remote US) 📞 (469) 878-2466 ✉ chaserhamilton@gmail.com

💼 Target: $140,000 – $175,000+

EXECUTIVE SUMMARY

TECHNICAL CAPABILITIES & DOMAIN MATRIX

Linux Systems Engineering:	
Enterprise SAN & NAS Storage:	
High Availability & DR:	
Virtualization & Hybrid Cloud:	
Automation & Telemetry:	

PROFESSIONAL EXPERIENCE

Senior Infrastructure & Storage Systems Engineer Dell Technologies July 2019 – Present

- Architect and oversee enterprise storage operations, LUN allocations, volume expansion, and SAN/NAS storage upgrade roadmaps across distributed production data centers.
- Direct Linux and Windows server health monitoring, high-availability clusters, and storage array reliability, consistently sustaining >99.99% uptime SLAs.
- Lead Tier-4 engineering investigations and root cause analysis (RCA) on complex OS kernel panics, storage I/O bottlenecks, and hypervisor storage fabric disruptions.
- Collaborate with platform architecture and network teams to install, configure, and maintain
